PROFESSIONAL SUMMARY

Dynamic and results-driven Senior Full Stack Software Engineer with **6+ years** of proven expertise in designing and delivering high-performance, scalable applications. Expert in modern tech stacks including **React, Django, FastAPI, Node.js, and AWS**. Demonstrated success in leading end-to-end product development across **FinTech, EdTech, Real Estate, and Oil & Gas** industries. Proven track record of **reducing deployment times by 40%, cutting server costs by 65%, and increasing user engagement by 40%** through innovative solutions and architectural optimizations.

CORE COMPETENCIES

- Full Stack Development
- Cloud Architecture (AWS/Azure)
- Microservices Design
- API Development & Integration
- Database Optimization
- CI/CD Pipeline Implementation
- Team Leadership & Mentoring
- Agile/Scrum Methodologies
- Performance Optimization

PROFESSIONAL EXPERIENCE

- **MeetDoors** Remote, US
Lead Software Engineer Mar 2024 – Present
 - Architected and launched comprehensive real estate discovery platform from MVP to production, serving **1M+ API calls/month** using Django, React, PostgreSQL, FastAPI, and AWS serverless architecture
 - Designed and implemented **AI-powered profitability analysis** algorithms and property recommendation engine, resulting in 35% improvement in user engagement and conversion rates
 - Built robust integrations with **BrightData scrapers, RentCast APIs, WhatsApp Business API, and Stripe payment gateway** for seamless user experience and automated workflows
 - Optimized cloud infrastructure using AWS Lambda, CloudFront, S3, and API Gateway, achieving **99.9% uptime** and reducing response times by 40%
- **SharpData** Remote, US
Senior Software Development Engineer Dec 2023 – Sep 2024
 - Spearheaded development of cutting-edge real estate analytics platform delivering dynamic reports and interactive dashboards using **React, Django, PostgreSQL, and GraphQL**
 - Integrated ag-Grid for advanced data visualization and implemented data pipelines with **Followup Boss and Sisu**, improving **data processing efficiency by 30%**
 - Led and mentored team of 3 junior developers across Automation Platform and FormBuilder products, implementing Agile methodologies and conducting comprehensive code reviews
 - Collaborated with Product Management and stakeholders to define project scopes, gather requirements, and deliver features ahead of schedule
- **Versatile Technology** Kuwait
Senior Software Development Engineer Feb 2023 – Dec 2023
 - Directed front-end development for Drill Explorer project in Oil & Gas sector, engineering critical modules including Wellbore Geology, Wellbore Geometry, BHA, Rigs, and Coring
 - Built high-performance front-end using IBM Carbon design system and DevExtreme within Angular framework, integrating advanced data visualization with **Plotly, Echarts and OpenLayers**
 - Architected scalable backend system using Spring Boot with comprehensive RESTful APIs, achieving **40% increase in user engagement** through optimized cross-platform application
 - Managed server infrastructure and databases ensuring peak performance and data integrity while implementing industry best practices and design patterns
- **Gourmet Garden** Bangalore, India
Full Stack Developer May 2022 – Feb 2023
 - Independently architected and migrated entire CRM system from PHP to Django backend with React frontend, taking full ownership of architecture, CI/CD pipelines, and database design
 - Integrated Yellow Messenger chatbot and multiple third-party APIs, resulting in **50% reduction in development cycle time** and streamlined operational processes
 - Optimized backend API design and infrastructure, achieving **40% reduction in deployment time** and **65% decrease in server costs** through architectural refinements

- **HummingWave Technologies** Bangalore, India
Dec 2021 – May 2022
Senior Software Engineer (SDE-II)
 - Managed and optimized two major **FinTech products (Finnable and LendingKart)**, designing robust backend systems using Java, DynamoDB, and AWS services
 - Implemented intelligent loan routing algorithms, KYC features, and Razorpay EMI payment modules, improving user onboarding experience by **40%**
 - Built scalable microservices architecture using AWS Lambda and API Gateway, creating comprehensive loan tracking dashboard with real-time data visualization
- **HackerEarth** Bangalore, India
Nov 2018 – Dec 2021
Technical Content Specialist & Full Stack Problem Setter
 - Created 150+ technical challenges and assessments across multiple technologies including Django, Spring Boot, Angular, Vue, and React for global developer community
 - Collaborated with product and sales teams to deliver customized content solutions, working directly with clients to understand requirements and exceed expectations
 - Developed comprehensive SQL, Data Science, and Machine Learning assessments, contributing to platform growth and user engagement

KEY PROJECTS & ACHIEVEMENTS

- **MeetDoors Backend Replatforming** 2024
 - Re-architected property listing APIs serving 10K+ properties using FastAPI and PostgreSQL, achieving **25% latency reduction** and improved scalability
 - Implemented advanced caching strategies and database optimization techniques for high-performance real estate data processing
 - Built V1 API architecture using RentCast APIs for initial data collection, then **completely replatformed to V2 backend** integrating BrightData scrapers for enhanced data accuracy and real-time property insights
- **Custom CRM Platform – Gourmet Garden** 2022
 - Designed and implemented a bespoke Customer Relationship Management (CRM) system tailored to Gourmet Garden's operations.
 - Integrated Yellow Messenger chatbot for automated customer interaction and seamless support workflows and built few **Flask** microservices for cron jobs and tasks along with **Twilio** integration to **WhatsApp**

TECHNICAL EXPERTISE

- **Languages:** Python, JavaScript (ES6+), TypeScript, Java, C++, SQL, Shell Scripting
- **Frontend Technologies:** React.js, Angular, Next.js, Vue.js, Tailwind CSS, Redux Toolkit, HTML5, CSS3
- **Backend Frameworks:** Django, FastAPI, Flask, Node.js, Spring Boot, Express.js
- **Databases:** PostgreSQL, MySQL, MongoDB, DynamoDB, Redis
- **Cloud & DevOps:** AWS (Lambda, EC2, S3, API Gateway, RDS, Athena), Docker, GitHub Actions, Jenkins, CI/CD
- **APIs & Integration:** REST APIs, GraphQL, WebSocket, RabbitMQ, Swagger, Postman
- **Specialized Tools:** ag-Grid, OpenLayers, Echarts, IBM Carbon Design System, DevExtreme
- **Emerging Technologies:** Generative AI (LLMs), MLOps, LangChain, OpenAI API, Web3, Firebase

EDUCATION

Lovely Professional University Punjab, India
2015 – 2019
Bachelor of Technology in Computer Science & Engineering

- CGPA: 7.78/10 — Relevant Coursework: Data Structures, Algorithms, Database Systems, Software Engineering

CERTIFICATIONS & AWARDS

- **Mission Impossible Excellence Award** HackerEarth, Oct 2019
 - Recognized for consistently delivering top-quality work within tight deadlines and exceeding performance standards
- **Kudos Award for Outstanding Newcomer** HackerEarth, Jun 2019
 - Awarded for exceeding expectations and maintaining flawless system integrity record

LEADERSHIP & SOFT SKILLS

Team Leadership: Successfully led distributed teams across multiple time zones

Mentoring: Guided 5+ junior developers through technical challenges

Communication: Excellent stakeholder management and client interaction skills

Problem Solving: Strong analytical thinking with focus on optimization

Innovation: Proactive in adopting cutting-edge technologies

Project Management: Agile/Scrum methodologies with on-time delivery

LANGUAGES

English (Fluent), **Hindi** (Native), **Telugu** (Native), **Odia** (Conversational), **Punjabi** (Conversational)
